

[DRAFT] Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: November 30, 2010

Water Body Under Evaluation:

Water Body ID #: 3746
Name: South Dry Sac River (Class C)
Length of Segment: 4.2 miles
County (ies): Greene

Use Attainability Analysis (UAA) Study:

UAA ID #: 1329
Submitter: Olsson Associates
Date(s) Conducted: August 28, 2008
Date Received: October 14, 2008
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☒ Yes ☐ No ☐ Unknown

Comments: The UAA survey was conducted in August 2008 and there was no WBCR observed. Multiple concrete walkways were cited along the segment as well as city and county parks indicating possible SCR use. An interview taken during the survey cited swimming, wading and fishing for numerous years on that classified segment.

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The stream met the max depth criterion at 1 of 3 sites for WBCR. An interview given at the time cited multiple WBCR and SCR uses. Therefore the committee recommends that WBCR be retained and SCR be added.

Committee Recommendation:

- ☐ Add Use ☒ Retain Use ☐ Remove Use
- ☐ Modify Use ☐ Inconclusive
